

LEFT + RIGHT ARE DETERMINED FROM THE PERSPECTIVE OF LOOKING TOWARDS THE RIDGE LINE

For complex buildings with porches and multiple roof lines please call us for further assistance with your order. 573-983.2057

EXAMPLE OF BUMP OUT BUILDING

DOOR KITS USE A DIFFERENT CONCRETE PIER FORM THAN A STANDARD BRACKET  
THE DOOR FORMS ARE REVERSIBLE AND DON'T HAVE A LEFT RIGHT ORIENTATION

Use these diagrams to help you determine what you need to order. Our Kits contain all the brackets, fasteners, hardware, and concrete forms you need. Look at your plans and count the quantities you will need to order write them in the blanks and print out the sheet. Then go to our online store or call 573-983.2057 to place your order.

**12" or 18" BRACKET HEIGHT**  
Our brackets come in 12" or 18" heights. We generally recommend 12" brackets for buildings no wider than 42' and no taller than 16'. Above that use 18". Consult of course for final specifications for your building. Check the option you want below.

12" Size

18" Size

**CORNER KITS**  
Our Corner Kits come in Left and Right configurations with only one side of steel. This is so you can fasten the exterior wood to the beam. Use the Diagrams to determine how many of each you need Standard Buildings need 2 Left and 2 Right Bump outs need some more consideration to get your order right.
